F-GF-CRIMPTW-2x2	2	14/20 KT Gold Filled Twisted Crimp, 1mmID, 2x2mm Per Piece
F-GF-JRC30-7	1	Gold Fill 20 GA 7mm ID Closed Jump Ring
F-GF-WIREPROT021	2	Gold Fill Wire Protector .021 ID, Per Piece
RN-06-G6L	8	Light Aqua 6mm Gold Foil Round Venetian Glass Bead
RONDELLE-SC-06-G1	14	Rondelle Crystal 6mm Gold Plate
SOLE-RN-12-G610	4	Aqua and Steel Sole Swirl 12mm 24kt Gold Foil Exposed, Murano Glass Bead
SOLE-SQ-16-G610	3	Sole Square 16mm Exposed Gold Aqua Acciaio

Instructions:

Step 1. Begin by cutting your wire. I prefer to use it off the end of my spool to save those couple of inches.

Step 2. If you cut the wire you can begin in the center and string from each side. Since I string directly onto the spool of wire, I begin at one end and string. (I have already laid it out on my beading board for sizing.)

Step 3. The layout is symmetrical, so between each bead you will use a Crystal Rondel, ending with the 6mm bead.

Step 4. To complete the bracelet string the crimp bead onto the wire, then the wire through the wire protector. At this point, add the clasp Then the wire back through the crimp. Carefully pull the wire taut.

Step 5. On the other end, string the crimp bead onto the wire, then the wire through the wire protector and insert this through a link of the chain.

Step 6. If you have strung this on the spool, then cut the wire about 3-5 Inches longer than the bracelet. Gently tighten the bracelet before crimping the crimp tube and finally cut the extra wire.

Hints:

For Longer:

If you need to make it longer, use a larger Clasp.

Or

Add additional 6mm beads, optional to use additional rondels between.

For Shorter:

Eliminate the ending 6mm beads

And/Or

Use [SOLE-RN-10-G610](#) instead of the 12mm beads
