

Black Satinato Necklace 20 Inches

Skill Beginner

This classic Necklace in all Black uses both matte and shiny beads for a sophisticated look. The matte beads are called Satinato in Italian.

This makes an approximately 20 Inch Necklace and the extension adds 2 Inches. If you want to make even longer, add additional seedbead between the beads.

Tools:

Side Cutter Crimping Tool

Supplies:

.Etch All: TS-ETCHALL-4OZ-DIP

Wire: WS-SFW02410SLV Soft Flex Original Satin Silver Wire .024 Diameter

SCH-RN-06-OP16	13	Opaque Black Murano Glass Round Bead, 6mm
SCH-RN-16-16	5	Solid Black 16mm Round Murano Glass Beads
SCH-ROND-11X7-16	8	Murano Glass Bead, Rondel, 11x7mm, Black

Instructions:

Step 1 Etch the 16mm rounds and the 11x7 Rondels. Follow the instructions on the bottle. Generally it takes about 20-30 minutes. Be sure to rinse the black beads well and do not dry on paper as it will adhere to them..

Step 2 Cut a length of wire approximately 25 Inches long, so you have room to work. Depending on how you like to work, you can begin with the center bead or work from one end. I like to work from one end to the other, first fixing the wire by adding the trigger clasp. This keeps my beads from falling off. Run the wire through the crimp bead, around the wire protector, adding the trigger clasp inside the horse shoe of the wire protector. Run the wire back through the crimp bead and crimp it. Then begin stringing.

Step 3.It is symmetrical so the design will be the same once we reach the center bead. Begin with a Heishi Spacer Bead, add 8 Seed Beads, 1 Heishi Spacer, 1 Black Round, 8 Seed Beads, 1 Heishi Spacer, 1 Black Rondel, 1 Heishi Spacer, 8 Seed Bead, 1 Black Swarovski Bicone, 5mm, 8 Seed Beads, 1 Heishi Spacer, 1 Black Rondel, 1 Heishi Spacer, 8 Seed Beads, 1 6mm Black Round Bead, 1 Heishi Spacer, 1 16mm Matted Black Round, followed by 1 Heishi Spacer and 1 6mm Black Round, then continue repeating this pattern around the necklace. (If you want to make it longer, just add additional seed beads as you go around.

Step 4. When you have completed the design, repeat the instructions for adding the crimp tube and the wire protector. This time, you will add the extender in the center of the wire protector. Pull the wire back through a couple of seed beads. Crimp the tube and cut the wire very close.

Step 5. Add the crimp cover over the crimp tubes on each end. You can use the crimp tool to close the cover.
