F-PW-FRAME-SQ18-AG	2	Simple Flower Frame Charm, Antique 22KT Gold Plated Pewter TierraCast

**Instructions: The same for both earrings**

**Step 1.** Dangles: Frames: Apply a thin layer of 2-part epoxy to the bottom of the Simple Frame. Place 5 of the Siam 4mm cubes and 4 of the green 4mm cubes into the frame in a checker-board pattern. (In this example the reds are placed vertically and the greens are placed horizontally. Repeat with 2<sup>nd</sup> frame and allow time to dry.

**Step 2** Bells: Insert a 1 inch headpin into a 4mm round crystal and form a small wrapped loop at the top, being sure it's small enough to tuck inside the bell. Attach this beaded drop to an Eye Pin then insert the eye pin through the hole at the top of the bell. Add the gold fill round ball to this. On the small bell use the 2mm Gold Foil Round, on the medium and large bells use the 3mm Gold Foil Round. Form a Wire wrapped loop on the end of each bell.

**Step 3.** Assemble the earrings: Attach one 4mm jump ring to the picture frame, and a 6mm jump ring, followed by another 4mm jump ring. Before closing this last 4mm jump ring, add on the small, medium and large bells which you have prepared.

**Step 4.** Open the earwire and insert the 4mm jumpring (will all the dangles). Repeat for the second earring.
