SCH-RN-06-OP11	6	Cobalt Blue Murano Glass Round Bead, 6mm
BA-JW15T-0	1	Beadalon 19 Strand .018" Bright 30' (Use Wire You Already Have).

Instructions:

Step 1. Cut the Beadalon wire (12 Inches) so you have plenty of room. (If you are familiar with stringing, you can use less. Use a Bead Stopper or just a piece of tape to make sure your beads don't fall off the opposite end where you are stringing.

Step 2 Add the 6mm bead, followed by the .5mm Spacer and the oval bead, another 5mm spacer and begin again. Follow this pattern until you have all 5 beads strung.

Step 3 Take one crimp and string on the wire, follow it with one wire protector.

Step 4. Insert one side of your clasp into the open space of the wire protector and then send the string through the crimp and through the 6mm bead. Fasten the crimp securely and cut the wire as close to the bead as possible..

Step 5. Repeat this on the other end the wire using the other side of your clasp

Step 6. Open the 7mm Jump Ring and insert the butterfly. Then with the jump ring open, insert it through the wire protector on the ring side of the bracelet. Close the jump ring securely..
