Instructions:

Step 1 Cut a length of wire 11 inches long. The bracelet is approximately 8 inches. This will give you space on each end. Begin by inserting the wire through the crimp bead, then around the horseshoe of the wire protector. Insert the loop of one end of your toggle into the opening in the horseshoe of the wire protector.

Step 2 Now insert the wire back through the crimp bead. Crimp the bead. Here I like to carry the wire through a couple of the beads, so carry it through the first lentil and cut close. Not that it is necessary for the security of the crimp, but cutting the wire at the crimp makes it hang rather one-sided.

Step 3.String the Sterling Silver Bead, followed by a disc and then alternate 1 SS bead, 1 Swarovski, 1 SS Bead and a lentil until you reach the last lentil. Then repeat the instructions for adding the other end of the toggle. Bring the wire back through the lentil and pull the wire so your bracelet has no loose area, but is not stiff. Crimp the tube, cut the wire and you're ready to wear!

Longer or Shorter?

If you need it shorter, there are several possibilities.

- Eliminate one of the lentils (they are approximately 20mm, so eliminating one will make it about $\frac{3}{4}$ " shorter.
- Use a smaller Swarovski Crystal between the lentils.
- The same is true if you want to extend the length. So add one lentil and the Crystals, SS Beads will add 1 inch to the bracelet.
- Extending even further by adding more Swarovski Crystals.
