RN-08-G1	2	Clear 8mm Gold Foil Round Venetian Glass Bead
RN-12-BIC-G512	4	Topaz Gaggia Gold Foil Bicolor Round 12mm

**Instructions:**

**Step 1.** Cut a length of wire approximately 12 inches long (or string with the wire still on the spool, which will save you a couple inches of wire each time you make a piece of jewelry).

**Step 2** String the beads beginning with the Pewter Oasis Antique Gold Caps around the 12mm Beads and the two 8mm Gold Rounds do not have Bead Caps..

**Step 3** When you after you string final 8mm Round, string the crimp bead, followed by the wire protector in and around the wire protector. Insert one end of your toggle clasp into the center of the horse show (wire protector). Pull the wire snugly against the wire protector and slide the crimp bead jutting against the ends of the wire protector. Crimp the crimp bead and cut the excess wire just after the 6mm bead.

**Step 4.** Cut the wire on the opposite end (if you are stringing on the spool). Otherwise, repeat the Step 3, inserting the clasp ring into the wire protector.

**Note:**

**You can use a crimp cover if you wish.**

We used a crimp cover over the crimp and gently close for each end of the bracelet. To secure it, use your crimp tool as it has the perfect curvature to keep the shape of the crimp cover.

**MOM:**

If you want to make this for mom, use our Pewter Mom Charm

F-PW-CH-H13-MOMGT and a 6mm Gold Fill Locking Jump Ring F-GF-LJR6
